

Penalties

Penalties are credits deducted when you violate a requirement. You will receive a webhook notification for each penalty, including the reason and the amount deducted, these requirements are needed all in last level but partly in levels before

Penalties are credits deducted when you violate a level requirement. In the early levels, only penalties related to the requirements and components available in that level will apply.

As you progress, more requirements and components are introduced, bringing additional penalties. In the final level, all requirements and their related penalties will apply.

For each penalty, you will receive a webhook notification containing the reason and the amount deducted.

Description:

- `Penalty_ItemBrokenDueToMissingPredictiveMaintenance` — Equipment breaks because required predictive maintenance was not performed.
- `Penalty_SendCarToBrokenOrUnderMaintenanceSpot` — A car is directed to a parking spot that is broken or under maintenance.
