

HackMY IoT 2026 - MyEvolution Hackathon

PARTICIPANT HANDBOOK

MyEvolution × La French Tech Malaysia × IEM Monash Students Section

Supported by: MONASH University, MyIoT

19–20 September 2026 · 36 Hours · Monash University Malaysia, Bandar Sunway

The six things that matter

1. Arrive Saturday 19 September between 08:00 and 09:00, Lobby. The opening ceremony starts at 09:00 sharp.
2. CODE FREEZE is Sunday 20 September at 12:30. Nothing submitted after 12:30 is judged.
3. Submit deliverables and elements required by the track (there will be in-course submission for specific challenges)
4. Pitches are 10 minutes per team, including Q&A, in your track's classroom, from 13:30 Sunday.
5. Bring your laptop, charger and student ID. All hardware and data are provided on-site.
6. If anything goes wrong: welcome desk in the Lobby, or the event chat channel.

Event timeline

All times are Malaysia time (GMT+8). The organizers may adjust the timeline as needed. Deadlines shown in capitals are fixed.

Day 1 - Saturday 19 September

Time	Activity	Location
08:00 – 09:00	Check-in and breakfast	Lobby
09:00 – 10:15	Opening ceremony - welcome, sponsors, rules, tracks reveal, judging criteria	Plenary
10:15	HACKING STARTS - teams form, mentors visit each table	Classrooms
12:30 – 13:30	Lunch	Porch
13:30 – 18:30	Hacking - optional mentoring	Classrooms
18:30 – 19:30	Dinner	Porch
19:30 – 22:00	Night hacking (optional)	Classrooms
22:00 – 08:00	Overnight hacking (optional) + supper	The Hive

Day 2 - Sunday 20 September

Time	Activity	Location
08:00 – 09:00	Breakfast	Lobby
09:00 – 09:15	Welcome and motivational speech	Plenary
09:15 – 12:00	Final hacking block	Classrooms
12:00 – 12:30	CODE FREEZE - submit repo, slides and demo link	Classrooms
12:30 – 13:30	Lunch	Porch
13:30 – 15:30	Pitches - 10 minutes per team, each track in its own room	Classrooms
15:30 – 16:00	Jury deliberation	Classrooms
16:00 – 17:00	Awards ceremony - track winners re-pitch for the Grand Prize	Plenary
17:00	Departure	-

General

The IoT Hackathon runs from **08:00 on Saturday 19 September 2026** to **17:00 on Sunday 20 September 2026**, at Monash University Malaysia, Jalan Lagoon Selatan, Bandar Sunway, 47500 Subang Jaya, Selangor.

It is a single continuous 36-hour event across two days. You may hack through the night or go home to sleep and return - the evening and overnight blocks are optional.

Format

- Team-based. Each team picks one of three tracks and works on that track's single challenge for the full event.
- Full track briefs are revealed at the opening ceremony on Saturday morning.
- All hardware, sensor kits and data are provided on-site - just bring yourself and your laptop.
- All meals are provided. Catering is halal - no pork or alcohol is served or permitted anywhere at the event.

Wi-Fi and connectivity

- Track 2 teams may use the Monash campus Wi-Fi.

- Track 1 and Track 3 teams connect via the MyEvolution LTE provided on-site.

Communication

An official Discord server will be provided for event announcements and participant support.

Teams organize their own internal communication.

Registration and eligibility

The Hackathon is open to students currently enrolled at the IEM partner universities of Monash, Year 3 and Year 4 undergraduates.

Requirements

- You must be currently enrolled at a University in Malaysia, and bring valid student ID to check-in.
- You must be able to attend both days in person.
- Teams are of 3 or 4 students.
- Registration closes one week before the event. Late registrations are not accepted.
- Members of the organizing committee and volunteer students are not eligible to compete.

Competition integrity

- All work must be produced by your team during the event. Teams may not use or build on a previous project - you start from scratch after the tracks are revealed.
- You may use AI coding assistants (such as Copilot, Claude or ChatGPT). If you do, you must be able to explain your code to the judges and show that your solution handles edge cases well.
- You may use open-source libraries and public datasets, with attribution in your README.
- Do your own work, and don't copy solutions from other teams or from outside the event.
- Any breach of competition integrity may lead to disqualification, decided case by case. Judges' decisions are final and binding.

Tracks and challenges

There are three tracks, each with one challenge. Your team picks one track and works on it until the submission deadline on Sunday 12.30pm. The summaries below tell you what to expect; full briefs are revealed at the opening ceremony.

Track 1 - Smart Agriculture & Environmental Monitoring

Challenge: SAVE THE FARM!

Keep a farm alive with smart tech. How? You'll find out on the day.

Track 2 - Industrial & Asset IoT

Challenge: NEXT-GEN PARKING

Rethink how vehicles find their space. Full brief revealed at kickoff.

Track 3 - IoT Security & Resilience

Challenge: OPERATION ZERO TRUST

Every device is talking, only the trusted ones should be heard. Details on the day.

How every track is judged

Code quality and logic count more than presentation.

Handling edge cases counts more than a polished ideal scenario.

Simplicity and robustness count more than complexity.

A simple solution that degrades gracefully beats an ambitious one that only runs on perfect data.

Cut scope early.

Prizes

All prize amounts are awarded per team. Total cash prize is RM 15,000.

- Every participant on a registered team receives a certificate of participation.
- Prizes are awarded after judging is complete.

Award	Prize (per team)
Track winner (each of 3 tracks)	RM 3,000
Track runner-up (each of 3 tracks)	RM 1,000
Grand Prize (1 team, from the 3 track winners)	RM 3,000
All participants	Certificate of participation

Judging criteria

Each track has its own jury: a MyEvolution track lead plus industry experts. Pitches run in parallel, one room per track, from 13:30 on Sunday. Each team has 10 minutes. Juries deliberate from 15:30; results are announced at 16:00, after which the three track winners re-pitch for the Grand Prize in the same 10-minute format.

Criterion	What the judges look for
Solution & functionality	Meets the challenge; correct, useful output within scope. Handles edge cases and degrades gracefully rather than breaking.
Technical execution	Clean, well-structured code; sound engineering; the team can explain every line. Efficient: complexity only where it earns its place.
Pitch & clarity	Clear reasoning, architecture and README; a convincing 10-minute pitch.
Progress & teamwork (continuous)	Assessed by mentors across the competition: how the team scoped, iterated, used feedback, and worked together.

This rubric is a proposal and mirrors the success metrics of the three tracks. Track leads may adjust the criteria according to their challenges.

Submission

Code freeze: Sunday 20 September, 12:30

Work submitted after 12:30 is not judged. There are no extensions. Submit early - you can keep working and resubmit until the deadline.

You must submit three things:

1. Code repository

A link to your repository, publicly accessible or shared with the organizers. Include a README explaining what you built, how to run it, and your assumptions.

2. Slides

Your pitch deck, as a PDF, including screenshots of designed pages or logs when relevant.

3. Demo link

A working demo: a deployed URL, or a link showing the system running.

Track leads will share detailed requirements when revealing the tracks on Saturday

Mentorship

Each track has dedicated mentors - industry experts from partner companies (MyIoT, FTM...) and academics from Monash. They give advice, answer technical questions and challenge your approach. They will not hand you a solution.

When you can get mentoring

- Saturday 13:30 – 18:30: mentors circulate and visit every table.
- Sunday 09:15 – 12:30: mentors circulate and visit every table.

Mentors are not available during the evening or overnight blocks.

Use your mentors early

The most common mistake at a 30-hour hackathon is discovering on Sunday morning that the scope was too large. Talk to a mentor on Saturday morning, not Sunday.

Practical information

What to bring

Laptop and charger · student ID · headphones · any personal medication · if staying overnight, a change of clothes and toiletries.

You do not need to bring any hardware. All hardware, sensor kits and data are provided on-site by the sponsor.

Getting there

Monash University Malaysia, Jalan Lagoon Selatan, Bandar Sunway, 47500 Subang Jaya, Selangor.

By public transport. Take the LRT Kelana Jaya Line to USJ 7 station, then switch to the BRT Sunway Line and alight at SunU-Monash BRT station. (From Hilton Petaling Jaya, board the LRT at Taman Jaya station.) A transit map is linked on the event page.

By Grab. Ride-hailing is a convenient option. Download the Grab app and set up payment before you travel, then search for “Monash University Malaysia - Gate A” as your destination.

By car. Three parking options nearby:

- Sunway BRT Complex, covered parking, RM7 maximum per day (recommended).
- Western Car Park, outdoor parking, RM3 nett per entry.
- Sunway Square Mall, covered parking, RM10 maximum per day, accessible via the Canopy Walk.

Food

All meals are included: breakfast, lunch, dinner and supper on Saturday; breakfast and lunch on Sunday. Hot coffee and tea throughout. Catering is halal; no pork or alcohol anywhere at the event. Meals are best eaten within two hours of serving and are cleared after that - take your food when it is served.

Dietary requirements are collected in the registration form.

Wellbeing and accessibility

A 36-hour event is tiring. Sleeping is allowed and encouraged - the evening and overnight blocks are optional and skipping them will not disadvantage your team. Tell us at registration about any accessibility requirement and we will arrange it.

- *Washroom and Prayer room are accessible at Level 3*
- *First Aid point at Ground Floor (guard house)*

Emergency Contact:

Campus Security / 24/7 Emergency Helpline: **+60 3 5514 6333 (Ext: 333 from internal landlines)**

National Emergency Services (Police, Ambulance, Fire): **999**

Rules you agree to

By registering for the IoT Hackathon, you agree to the following. They exist so the event is safe, fair and enjoyable for everyone.

- Treat everyone - participants, mentors, judges, staff and volunteers - with respect.
- Look after the venue: do not damage or misuse equipment, furniture or facilities.
- Follow the reasonable instructions of the organizers and Monash University Malaysia campus rules throughout the event.
- Do your own work: the project you submit must be built by your team during the event.
- Keep everyone safe: follow all campus safety, security and emergency procedures, and don't do anything that puts yourself or others at risk.
- The organizers may adjust the schedule, format or logistics of the event where necessary, and will communicate any changes as early as possible.
- Judges' decisions are final and binding, and are not open to appeal.
- The organizers reserve the right to use their discretion and reasonable judgement to keep the event fair and running smoothly.

Code of conduct

Everyone is welcome and everyone is treated with respect. The following lead to removal from the event: harassment, discrimination or intimidation of any kind; unwanted physical contact; deliberate disruption of talks, pitches or other teams' work; damage to campus property or equipment; bringing pork or alcohol onto the premises; or presenting others' work as your own.

Monash University Malaysia campus rules apply throughout the event.

Reporting a concern

If you experience or witness anything that breaches this code, tell one of our contacts. They will handle it discreetly.

- Myriam - 0107115331
- Abdou - 01160761016

Photography and data

The event will be photographed and filmed. If you do not want to appear in photos, tell the organizers and we will do our best to accommodate you.

Personal data collected at registration is shared with the organizers and sponsors, who may contact you later about other events or hiring opportunities.

Getting help during the event

If you need...	Go to
Anything at all, in person	The welcome desk in the Lobby
Technical help with your project	Your track mentor
Help with submission	Your track mentor
Wi-Fi, power or equipment problems	Your track mentor
To report a code of conduct concern	Myriam or Abdou (see Code of conduct)
Medical or emergency	Campus Security - 24/7 Emergency Helpline: +60 3 5514 6333

Frequently asked questions

Do I need a team before I arrive?

Teams are formed on Saturday morning after the opening ceremony. You may also arrive with a team already formed. Teams are of 3 or 4 students.

Do I need IoT hardware experience, or my own kit?

No. All hardware, sensor kits and data are provided on-site. Every challenge can be tackled with what we give you. Strong software logic matters more than hardware experience.

Can I use AI coding tools?

Yes - but you must be able to explain every line of your code to the judges and show that your solution handles edge cases well.

Do I have to stay overnight?

No. The evening and overnight blocks are optional. Teams that go home to sleep are not disadvantaged.

What if my demo doesn't work on the day?

Judges assess code quality, logic and edge-case handling. A clear explanation of a partly working system scores better than a polished demo with nothing behind it.

Is there a registration fee?

No. Participation and all meals are free.

See you on 19 September.
